Abdul Mu'ti Mausul Fahmi

Fullstack Developer

abdulmfmuti@gmail.com | 085802008881 | Cililitan, East Jakarta

PROFILE

Fullstack Engineer with 6+ years of experience designing and building lending platforms, financial reporting tools, and REST APIs using Laravel, Go, and Next.js. Experienced working with high-traffic loan processing systems, with hands-on experience integrating financial data into government regulatory platforms such as PUSDAFIL (OJK).

SKILLS

Backend: Laravel, Native PHP, CodeIgniter, Go (Golang), Java (Spring Boot, Grails),nodeJS(NestJs,ExpressJS)

Frontend: React.js, Next.js, Vue.js, JavaScript, jQuery, Tailwind CSS

Database: MySQL, PostgreSQL, SQLite

DevOps & Infrastructure: VPS provisioning & Linux server management, Nginx configuration & reverse proxy, PM2 process management (FE & BE deployment), Domain & DNS configuration, SSL setup (Let's Encrypt), Production environment & API integration setup

Tools & Project Management: Git, Postman, Jira, Trello, Airtable

Leadership & Collaboration: Team coordination & task delegation, Sprint planning & task monitoring, Cross-team communication facilitation, Project timeline tracking

PROFESSIONAL EXPERIENCE

Senior Fullstack Developer — PT J&S | *September 2025 – Present*

- Led end-to-end development of The Luxury Asia web platform, including a full-featured admin dashboard to streamline internal operations (Next.js, NestJS)
- Engineered the Casa Italia web platform with a comprehensive management system, improving content and operational efficiency (Next.js, Laravel)
- Developed the Homelogy platform with a scalable admin dashboard to support business growth and maintainability (Next.js, Laravel)
- Designed and implemented a robust point management system to handle user reward points and transaction workflows (Next.js, Go)
- Mentored and coordinated freelance junior developers, ensuring code quality, timely delivery, and adherence to development best practices
- Collaborated with cross-functional teams to define system architecture and improve application performance and scalability
- Conducted **security testing and penetration testing** on applications and servers to identify vulnerabilities and minimize security risks.

Senior Fullstack Developer — PT Astra International | *April 2025 – August 2025*

- Designed and implemented business-specific RESTful APIs enabling integration with AUTO2000 internal platforms (CodeIgniter 3, MySQL)
- Improved and maintained enterprise internal management systems by extending existing Java Liferay applications (Java Liferay, MySQL)

Senior Fullstack Developer — PT Pinjaman Kemakmuran Rakyat | *July 2020 – May 2025*

- Led and mentored junior developers in system development, task delegation, and code review processes
- Developed and maintained loan management systems for admins, funders, and borrowers (Native PHP, MySQL)
- Built a partner-company collaboration platform for loan dashboard management (Laravel, PostgreSQL, MySQL)
- Built and later upgraded automated reporting APIs for borrowers' loan data submission to PUSDAFIL (Native PHP → Go, MySQL)
- Designed and developed RESTful loan APIs for mobile and web applications (Laravel, PostgreSQL)

- Developed a lender monitoring dashboard to track funding activities (Laravel, PostgreSQL, MySQL, Vue.js)
- Integrated frontend product modules with backend APIs based on UI/UX design specifications (React.js)
- Built and maintained the QRIS dashboard system (Go, CodeIgniter, Laravel, MySQL)
- Developed the HCIS (Human Capital Information System) management system (Laravel, MySQL)
- Implemented HR dashboard frontend slicing based on the design system (Next.js)

Freelance Web Developer — PT Invinitec | *February 2020 – May 2020*

- Built and developed web-based information systems for Indonesian National Parks using REST API integration (Laravel, Vue.js, MySQL)

Freelance Web Developer — PT SISI | *April 2019 – September 2019*

- Developed templates and resolved bugs for the RMS project at PT GMF (Native PHP, MySQL)
- Developed vendor, material service, and file management modules for the IPS (Integrated Procurement System) application at PT PTPN (CodeIgniter, MySQL)
- Built and enhanced innovation management applications for PT GMF (CodeIgniter, MySQL)
- Developed COGS (Cost of Goods Sold) modules for customer support and sales applications (CodeIgniter, MySQL)

Web Developer — PT Surya Manggala Informatika | *February 2018 – January 2019*

- Developed customer and payment modules for the e-budgeting application (Java Grails Framework, MySQL)
- Implemented location tracking and reporting modules for the project monitoring system of Samsat Banten Province (Java Grails Framework, MySQL)
- Built and developed a food ordering application for Shaburi & Kintan Buffet (Grails Framework, MySQL)
- Developed a school management system for YPM (Native PHP, MySQL)

EDUCATION

- Bachelor of Information Systems — Nusa Mandiri University, Jakarta (2022–2023)
- Diploma in Informatics Management — BSI Tasikmalaya (2014–2017)
